NEW PRODUCT NOTIFICATION

Jeep Wrangler TJ/YJ Multi-fit Winch Bar

The Multi-fit Winch Bar is specially designed with shorter wings so that it will fit both the Jeep Wrangler YJ and TJ Models, and is also ideal for customers that are fitting larger tyres or would like to maximise their approach angle.

Please note that whilst this bar is built to the usual high quality standard expected of ARB bull bars, in order to keep the price as low as possible several features present on other ARB bull bars have been omitted including indicators, CB Aerial mounts, HiLift Jacking Point and winch leads.

Features:

- 3mm thick laser cut and folded main pan.
- 60mm OD x 2.6mm thick mandrel bent centre tube.
- SRS Airbag Compatible mounting system (applicable on models fitted with SRS Airbags).
- Compatible with Warn 8/9/9.5Ti & 9.5XDC Low Mount Winches.
- Integrated winch & fairlead mount ensures maximum bumper approach angles, fully tested to endure extreme winching loads.
- Fully welded recovery points.
- Integrated driving light mounts to suit 800/900 Series IPF.
- Satin Black Powder Coat Finish

Date:

21.04.11
